

Reviewers of Revista Cubana de Medicina Militar during year 2025

Revisores de la Revista Cubana de Medicina Militar durante el año 2025

On behalf of the Editorial Board of the Revista Cubana de Medicina Militar, we wish to extend our deepest gratitude to each of the reviewers for their invaluable work during 2025. Their rigorous and selfless work is key to maintaining and raising the scientific quality of the articles we publish. The task of peer review is an act of generosity and academic dedication. In the current context, marked by multiple challenges and limitations, the time you dedicate to analyzing, constructively critiquing, and suggesting improvements to the manuscripts we send you is all the more valuable. We appreciate your effort, aware that this work is based solely on an ethical commitment to science and to the Cuban and international scientific community.

Thanks to your observations, corrections, and recommendations, many articles reach the levels of quality, methodological rigor, and relevance that give them greater visibility and an effective contribution to the development of health sciences. You are our advisors on scientific integrity, and your expert judgment enables our Journal to solidify its position as a leading resource in the field of medical sciences and Cuban military medicine.

We recognize that your work is not easy; it requires meticulous reading, critical thinking, empathy with the authors, and, above all, academic and intellectual honesty. Despite your busy schedules and clinical, teaching, or research responsibilities, you responded with seriousness and dedication. This highlights your professionalism and your passion for science.

We remain committed to continuing to improve our processes, further highlighting your important contribution, and making our Journal an increasingly collaborative scientific space. We hope to continue counting on your valuable collaboration. Please accept our warmest regards and the assurance of our gratitude.

Below, in alphabetical order, is the list of reviewers who contributed to our Journal in 2025.
